

Homework Assignment for Week 21 (due 3/5)

The assignment for this week is to continue the screenplay started last week. It doesn't have to be 100% complete, but you should at least getting close to the end of Act 1 (the first Plot Point).

So, for next Monday, write at least 10 pages of screenplay in the format I showed you in class. Your assignment from last week COUNTS toward this page total—so just add at least 7 more pages.

Spelling and grammar COUNTS!

Here's the link to the format:

Screenwriting Software Help to make things WAY easier:

Feel free to use Word or any other writing software you want. Here are some additional options:

1. Google Docs: Google Docs has add-ons that can help you with screenplay formatting. I tried Fountainizer and Screenplay Fomatter. Neither is perfect, but they're free, and they'll probably help you a lot. You can try downloading them and see what you think.

2. Amazon Storywriter: <https://storywriter.amazon.com/>

This one is also free and appears to be quite good. It works with an Amazon.com account (also free, and you or your parents may have already).

NOTE!: You can start a script from scratch or import a screenplay you've already started on. If you import, first save your work in progress (in Word or GoogleDocs) as a pdf file. Then you can upload the pdf file into Amazon Storywriter (it won't take a Word or GoogleDocs file).
